

Customer Churn & Segmentation Dashboard Business Requirements Document (BRD)

Project Name: Customer Churn & Segmentation Dashboard

Project Type: Independent Practice Project

Methodology: Agile

Tools: Confluence, Jira, Power BI

Purpose: Create a dashboard that helps stakeholders monitor customer churn and customer segments to support retention strategies.

Portfolio Sample

Project Overview

This project aims to create a Customer Churn & Segmentation Dashboard that enables business users to monitor customer retention, analyze churn drivers, and evaluate customer segments for proactive retention efforts.

Business Problem

The organization lacks a centralized view of customer churn and customer segment performance. Retention teams currently rely on manual reports and ad hoc analysis to understand customer behavior.

Business Objectives

- Improve visibility into customer retention trends
- Identify customer segments at risk of churn
- Support data-driven retention decisions
- Reduce time spent creating manual reports.

STAKEHOLDERS

Stakeholder	Responsibilities
-------------	------------------

Retention Marketing Manager	Uses dashboard insights to plan retention initiatives
Business Analyst	Defines requirements and validates business needs
Data Analyst	Prepares and maintains source data
Operations Manager	Monitors customer trends and performance

Scope

In Scope

- Customer Segmentation Analysis
- Churn Metrics
- Dashboard Filters
- Trend Reporting
- Customer Detail Views

Out of Scope

- Real-Time Predictions
- CRM Integration
- Automated Marketing Campaigns
- Marketing Automation Workflows

Functional Requirements

ID	Requirement	Priority
FR-1	Display customers by segment	Must Have
FR-2	Display churn rate by segment	Must Have
FR-3	Allow date filtering	Must Have
FR-4	Show churn driver analysis	Must Have

FR-5	Display monthly trends	Should Have
FR-6	Export customer lists	Could Have

USER STORIES

✓ US-1 Churn Analysis.

As a Retention Marketing Manager,
I want to identify churn drivers,
So that I can prioritize retention efforts.

Acceptance Criteria

- Top churn drivers are displayed.
- Results are filterable.
- Data refreshes monthly.

✓ US-2 Segment Overview

As a Retention Marketing Manager,
I want to view customers by segment,
So that I can understand customer distribution and prioritize retention efforts.

Acceptance Criteria

- Segment counts are displayed.
- Segment percentages are displayed.
- Data matches source records.

✓ Success Criteria

- All Must Have requirements are delivered.
- Dashboard data matches source data.
- Users can identify customer segments easily.
- Churn drivers are visible and actionable.
- Dashboard supports retention decision-making.

✓ Risks & Assumptions

Assumptions

- Historical transaction data is available.
- Customer segmentation rules are approved.
- Stakeholders agree on churn definitions.

Risks

- Data quality issues may impact dashboard accuracy.
- Additional requirements may increase project scope.
- Business definitions may change over time.

SUCCESS CRITERIA

- All Must Have requirements delivered
- Dashboard matches source data
- Users easily identify segments
- Churn drivers clearly visible

Requirements Traceability Matrix

Requirement	User Story
FR-1	US-1
FR-2	US-2
FR-3	US-1
FR-4	US-2
FR-5	US-1
FR-6	US-2
